

Business 2 Business Gateway

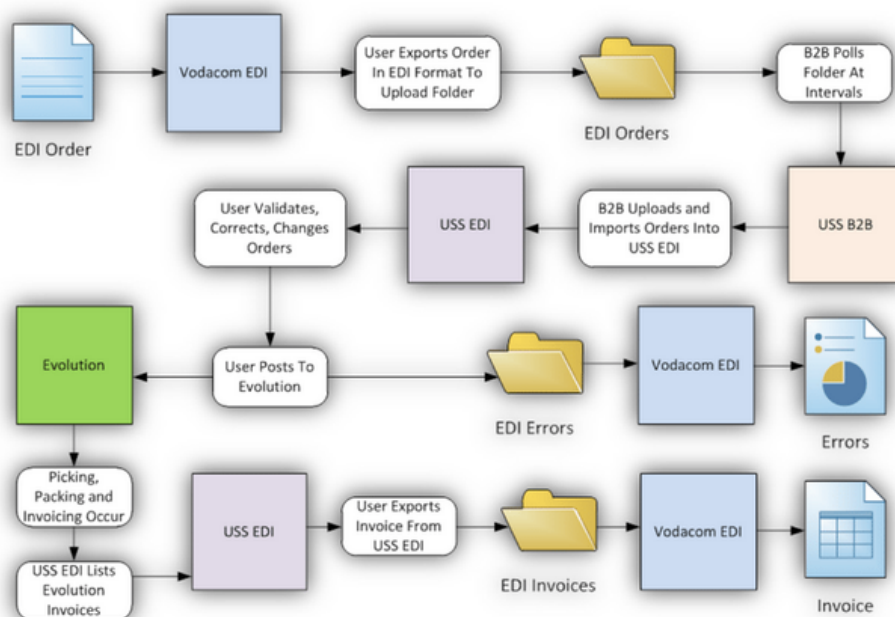

Easily Integrate Sage Accounting Platforms With Disparate Systems & EDI Protocols

The Business-2-Business Gateway is an exceptionally powerful module that enables the Sage Accounting Platforms to be seamlessly integrated with disparate systems.

The Business-2-Business Gateway allows for integrations with Sage Business Cloud, Sage 50c Pastel Partner, Sage 200 Evolution and more, and facilitates complex supply chain data transfers inclusive of documents such as Purchase & Sales Orders, Invoices, et cetera.

If you require automation between Sage Accounting Platforms and your outsourced warehousing and logistics provider's system, the Business-2-Business Gateway will enable complete integrations to be created hassle-free. Send orders created in your Sage Accounting Platform to the outsourced system and update inventory levels within Sage Accounting System. The Business-2-Business Gateway uses the Sage SDK Connector and API ensuring easy upgrade of the software and integrations - protecting your investment.

Example Of Sage And EDI Invoice Integration Via Vodacom EDI
